A SLAT GATE.

It Will Prove Serviceable for the Barn Doorway.

Where the horse stable opens into the buggy room and it is necessary to tion against horses getting loose and injuring the buggles.

The cut herswith shows a light gate we have in use in our horse barn. It is very simple in construction, but serves

very important purpose. Were it not for this light gate we would find it necessary to keep the door closed between the horse stable and buggy com, thus shutting off ventilation.

The gate is binged onto the rolling door with light strap hinges, explains a writer in Prairie Farmer, so that when the gate is not in use it swings around and fastens to the large door out of the way.

For material in making the gate we use inch strips of good pine for the horizontal pieces. The upright pieces are light strips gotten out for fence

I find a light gate of this character a good thing to keep poultry out of the barn during the summer months.

KEEP STOCK IN CONDITION.

No Time of Year When They Should Be Let Run Down.

When? Right now-to-day and toporrow and all the time till it comes ime to let the cattle out to pasture. Sometimes we may get a little careess about this. So many men say: What hurt does it do to let the cows go with scant rations for a few weeks in winter? By-and-by they will go out to pasture and then they can gain up again. It will not cost so much to get them in good flesh then as it would now, and feed costs so in win-

Of course feed costs. That is a pregone conclusion. If we keep stock, however, ought we not to be ed to do the fair thing by it? There are some of the best reasons why, from our own standpoint, we should do this. One of these is, that if we turn the cattle out in spring poor and weak it will take so long to get them up in good shape to do heir best that we shall lose more han we shall gain by scrimping now.

We are learning that cattle are sure to take the feed we give them if they are lean and in poor rig and lay it on heir backs, first of all; then after they are in good condition they will apply the surplus to the milk-pail. It s always the surplus that we get. the oil you would use in dipping or keep our cows just on the verge of hunger.

The Farmers' Voice well says that it is the cow which has been kept well Cows poorly treated are our farm charges, to be maintained at the cost of what the best cows do. There should be no such charges; every cow should be a producer.

LABOR OF THE HORSE.

Lack of Hired Help.

Some one has figured out that it costs on the average only one-half as much to feed a horse as it does to feed a man, and that the horse will do ten times the amount of work that it is possible for the man to do. If this estimate is correct, then a dollar's worth of food given the horse will pended in feed for a man. Therefore, when man domesticated the horse be immensely increased his own power of ways be enough horses to do it. Farmers try to economize on the number of horses and have to leave much work undone. In the event of hired help being scarce, it is sometimes possible to offset this lack by increasing the number of horses kept. In some parts of the west and northwest, declares the Farmers' Review, the horses being used. Five are hitched thus enabled to turn two furrows at a time and practically double the work "I have discontinued your paper on that one man has to do. This is the result of the complete utilization of

HEAVES CAUDED BY HAY. Veterinarian Cautions Against Too Heavy Feeding.

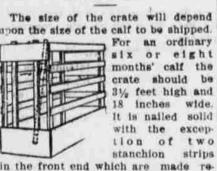

A noted veterinarian of Canada says that one full feed per day of hay is enough for a horse; that because the work horses are busy in crop time they only get one full feed of hay every 24 hours, but in the winter are frequently allowed to stand and eat all day. He says that a horse to be in perfect health should have the stomach emptied, of the previous meal for two or three hours before he is given another. If such is not the keep the door open for ventilation I case, digestion will not take place in find that a small gate constructed of a perfect manner, and disease is likely light material is an excellent protecto result. There is a remarkable sympathy between the stomach and the lungs, because of the fact that the same nerve trunk supplies nerve force to both organs. When the stomach is deranged from improper feeding the lungs are liable to become sympathetically affected and heaves often result. Care should also be taken that a horse should be fed no dusty or musty hay. This dust is as light as air, and the horse in breathing draws it right into the lung tissue with every breath, and this substance, being an irritant, is very prone to develop the heaves. If no better hay can be obtained, the dust should be laid by sprinkling with water, when the horse will not breathe it, but will be swallowed with his feed and probably do him no harm; but when at all possible only bright, clean hay, free from dust, should be fed to horses. Again no horse is in fit condition for active exercise with a stomach distended with hay, because the stomach situated as it is right behind the lung space, if full, bulges forward into the chest to such an extent that the lungs have no room to properly expand, and cannot perform their functions properly; and anything that interferes with the function of the lungs predisposes to heaves.

> winter months they would come out in the spring in better condition. SHIPPING CRATE.

ground. Bore a 14-inch auger hole 16 inches deep in top of post. See cut. Keep this hole oil, and, says the Missouri Valley Farmer, the hogs by rubbing against

it will do the rest with one-quarter of spraying.

STOCK TALK.

Skim milk is good for lambs. The farmers are not yet fully awake to the value of a good cow.

Feeding high-priced stuff and marketing at a loss is an unprofitable proposition. The young pig needs bone and mus-

cle developing foods, both before and after it is born. The time will come when farmmade butter will sell for as good a

price as any other kind of butter. Keeping the hogs clean will not always keep away cholera, but it has a strong tendency in that direction.

Do not turn stock into the meadows when they are wet, as the tramping is very injurious at that time.

Try This Plan.

Rather than feed all corn to stock on which you want to produce growth, you had better sell corn and buy wheat bran, middlings, oil meal or any other feed high in protein that can be had at right kind of prices and mix with your corn. I know it is a common practice among some farmers to finish their hogs for the market on an exclusive corn ration. I very much doubt the wisdom of this method. I do not believe there is a period in a hog's life when a variety of feed will not be productive of better results than an exclusive corn ration.

Don't Feed Corn Alone. Tests have shown that the largest gain from feeding cornmeal alone is less than one-half pound per head per day on well-bred swine. Something is

eeded beside corn, although this is

ery essential.

Study Your Cowe. Study your cows. They will teach ou more than lots of books. Read alry and stock papers and books. alk to scientific men and your mind

Jesus Teaches Humility

Sunday School Lesson for April 26, 1908

Specially Prepared for This Paper

LESSON TEXT .- John 13:1-20. Memory GOLDEN TEXT .- "A new commandment I give unto you, that ye love one another as I have loved you."-John

TIME.—Thursday evening, April 6, A. D. 30. Nisan 13, the day before the Passover meal. The evening before his His last meeting with his Institution of the Lord's PLACE.-An upper room in Jerusalem.

Comment and Suggestive Thought. "Arnold of Rugby" called Christ's washing of his disciples' feet the most remarkable of his deeds. This is a lesson of the strongest possible contrasts. We are to see Christ's majesty at its highest point of earthly glory, and his humility at its lowllest. The first picture gives the church a proud sense of its coming triumph in the world: the second reminds the church that it triumphs only through its loving, tender ministries to men., The first picture teaches us personally that if we serve Christ we have at our disposal infinite resources of power

and authority; the second, that we

must use those resources meekly, in

serving others. Christ fulfilled promptly his promise to Peter of an explanation. This explanation is in two parts. The first is a statement of his own supremacy. that he was Master and Lord. "One of you calls me the Teacher; another, the Lord."-Bishop Middleton. "Corresponding to which the followers were disciples or servants."-Professor Vincent. "There was no title so lofty, no honor so exalted, no devotion so absolute, that Christ rejected it at the

hands of men."-Rev. J. Ritchie Smith. The second part of the explanation as that Christ's deed was given as an example. It "was saying in the language of action that the Son of man came not to be ministered unto but to minister, and that the law of his kingdom was the law of helpfulness (Mark 10:43-45)."—Professor Gilbert. Certainly no one of them would claim to be greater than Christ. They were servants, he was their confessed Lord. They were apostles, "men sent" (v. 16); he was the sovereign that sent hem forth. Surely, therefore, if he had washed their feet, they also ought to wash one another's feet. "By this great object lesson Christ taught the apostles, and his disciples throughout all time, that the noblest end man's endeavor loving service."-Prof. Noah K. Davis. Ph. D. "Now let man blush to be proud, for whom God is become hum

ble."-St. Augustine. Christ intended his commandment to be taken literally when necessary. But, now that shoes have taken the place of sandals, it is to be observed in the spirit rather than the letter. Christ did not institute a rite, such as that celebrated in Rome on Thursday in Holy Week, when the pope washes the feet of a few aged paupers, after due private preparation, in he presence of the proudest rank. Set a post four feet long, four inches "It used to be practiced by English in diameter two feet deep in the sovereigns on Maundy Thursday, James II. being the last who did so.' -Century Bible.

The spirit of the commandment is to be observed. 1. By the performance of lowly and disagreeable physical service for others, when necessary. Those filled with coal that nurse the sick, care for the aged and helpless, or work among the degraded or the very poor, are often called to deeds like feet-washing. "The noblest form of help is to

help men to get rid of their sin."-Alexander Maclaren. That is the cleansing we all need most. "To wash one another's feet is, in the deeper meaning of the thing, to help one another out of the evil that is in the world, to aid one another in the keeping of a pure conscience and of wholesome and holy life."-I. Marshall Lang, D. D. "We sometimes talk of the language of the hands. And sometimes of the language of the eyes. But I think there is also a language of the feet, and I could translate the whole Gospel into it. For first comes Jesus (when we are bowed with sin), and he says: 'Son of man, stand upon thy feet.' And then comes Jesus (when we wish to serve him), and he says: 'Wash one another's feet.' And then in the morning, when we are his forever, it is at his feet we shall cast our crowns."-Rev. G. H. Morrison.

Those that are superior in one way should remember that every one may be superior in some way. "Arnold of Rugby" called attention to the pronoun in "wash one another's feet." Rich and poor, high and low, learned and ignorant, are, he declared, "members one of another, not two distinct castes." Each can help the other, teach the other. The Lessons for Servants .- Many

Christians are rulers, but all Christians are servants. The minister of a church is the one who ministers to its needs. The prime minister is the head servant of the state.

Let us not be satisfied with our service till it springs from love, and not merely from a sense of duty.

Humility must know itself to be humble, must be unconscious. "Some one had just been reminding a certain bishop of an act of goodness which he had performed. He said: 'Any good I have ever been able to do is of the unearned mercy of God.' That is true humility. We feel that the merit is not ours, but God's."-Rev. R. J. Campbell.

True service goes where it is needed, and often our enemies need us far III Short Street, more than our friends.
